### **Material Development, Future Direction and Prospects**

The Group has engaged in the Tinplate Manufacturing business since 2012. Located in Jiangsu, the Tinplate Manufacturing segment with its Taizhou plant ("**Taizhou Plant**") is principally engaged in manufacturing, sales and distribution of tinplate products. With a strong team of competent and experienced personnel, coupled with an indisputable technology, high-quality-level products as well as comparatively new machine and equipment, the Group has successfully strived the resumption of the operations of the factory in Taizhou in May 2018.

Tinplate products are widely used in packaging material such as processed food and beverage, paints, aerosols, cooking oil and cover/lid/shell of different types of containers. Tinplate products are non-toxic, highly resistance to corrosion, able to preserve food better by blocking light as oxidant and also with high recyclability. The stringent environmental rules in mainland China have forced unqualified factories closure since 2018 which has significantly lowered the supply of tinplate products in PRC and export. Since the inception of revitalization, the Taizhou plant has been designed with the proper consideration on environmental protection. A 3-year sewage disposal license was granted on 18 December 2018 by the Taizhou City Environmental Protection Bureau which enable the Taizhou plant to expand its value chain on a critical process the "pickling" for the raw steel. Taizhou plant is highly recognised by the Government of Xinhua City, Taizhou in Jiangsu province.

Demand has also been growing with the increasing use of tinplate to replace the non-degradable packages and also as substitutes to overcome the current dis-advantages in using PET material for (e.g. for cooking oil). Furthermore, the increasing consumption of canned food together with the growth of e-commerce purchases on canned food all over the world compounded the growth in demand of tinplate products.

With the support of our Executive Chairman, Mr. Zhu Jun, the Company considers its Tinplate Manufacturing business having enormous growth potential and becoming the key revenue driver of the Group.

The Board will continue to review the available options to meet the requirements of Rule 1314(1) of the Listing Manual and removal from the Watch-List.
